**DETAILED ACTION*****Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first tube end being part of a continually extruded corrugated tube (claim 17) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the

Art Unit: 3679

page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

Applicant is reminded of the proper language for an abstract of the disclosure.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In line 8, the phrase "according to the present invention" should be deleted.

The abstract of the disclosure is objected to because: "(Fig. 1)" should be deleted. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities:

On page 1, the filing date of the Swiss Application should be "July 3, 2002".

On page 3, fourth paragraph, the phrase "according to claim 1," should be deleted.

Appropriate correction is required.

### ***Claim Objections***

Claim 7 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

Claims 1-25 are objected to because of the following informalities:

In claim 1 line 3, "a first tube end" should be "the first tube end".

In claim 1 lines 6-7, the phrase "with distance" should be replaced with "and distanced".

In claim 2 line 3, it should be clarified what "these" references.

In claim 8 line 2, the phrase "with distance to" should be replaced with "distanced from".

In claim 9, to avoid confusion, the claim should be reworded to state that one of the tubes is insertable into the other tube.

Appropriate correction is required.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

This application is in condition for allowance except for the above formal matters.

Art Unit: 3679

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
